Terri, sorry for the delay in answering...

While we did at one point send an info request letter to Cabot the request was limited to any home well sampling they had performed in Dimock. We never requested or analyzed for any potential impacts to DW quality in Dimock.

Dennis.

Dennis,

I'm not aware that we ever looked into whether Cabot's operations impacted wq in Dimock. I know the state did. But did we ever request information (as we've recently done in the case of some other drilling companies) to determine if they're complying with certain federal regs where we have jurisdiction? Please advise. Thnx!

Terri - We're running a story in tomorrow's WSJ about the Dimock release. Can you tell me whether EPA examined whether Cabot's activities ever contaminated that water - say, two or three years ago - or whether the company violated any rules?

Thanks,

Tennille Tracy
